

This Pledge for Safety sets out the agreement to drive in a way that is designed and intended to minimise the risk of being involved in a collision

I agree to the following:

- I will treat all other road users with courtesy whatever their behaviour including people on foot, cyclists and other vehicle drivers
- I will not to get into conflict with other road users
- I will share the road safely with cyclists because bottom line is they could be killed in a collision
- I accept that people on foot sometimes cross the road when it would be safer to wait
- I will adjust my driving at all times to prioritise the safety of people on foot and cyclists
- I will share the road with others rather than trying to push ahead
- I will treat driving like any other social activity – we all have to get by together
- I will be patient with slower drivers – they probably have a good reason
- If I see risk in other people’s driving I will allow a bigger safety gap to avoid them
- I will anticipate and understand the actions of other road users
- I will apply the 2-second rule as a minimum to avoid a rear end shunt
- I will drive to get the best MPG
- In bad weather I will make a genuine adjustment to allow for poor visibility and longer stopping distances
- **I will never knowingly take risks**
